BGCC VIRTUAL PROGRAM: ELEMENTARY SCHOOL

WEDNESDAY, APRIL 7<sup>TH</sup>, 2021

<b>Welcome!</b>	Introduction	Daily Introduction from BGCC staff
<b>Academic Success</b>	Education	<p><b><u>Wind Speed Meter:</u></b> On a windy day, it is hard to keep your hat on! The power of the wind can even be strong enough to power large wind turbines to make electricity! In this experiment, find out how you can make your own instrument to measure the speed and power of the wind. How does it work? In this experiment, you will investigate how the speed of the wind is measured by an anemometer.</p> <p><a href="#"><u>Click Here</u></a></p>
<b>Academic Success</b>	Get Crafty! Arts	<p><b><u>Geometric sidewalk art</u></b></p> <p>Make a cool geometric design on your sidewalk with only two things! Take some masking tape and start taping off triangles into the sidewalk, making random sizes as you go. Then take a few different colors of sidewalk chalk and start coloring in each triangle a different color. When you're done coloring each triangle in, peel the tape off to reveal a cool geometric design on your sidewalk!</p>
